E-PRESCRIBING MEDICATION HISTORY CONSENT

Patient Name _____ **Date of Birth** ____ / ____ / ____

I understand that NeuroPsychiatry Center utilizes e-prescribing. I understand that e-prescribing allows the practice to send prescriptions electronically to pharmacies, eliminating the need for prescribing via paper, phone, or fax. E-Prescribing is fast, convenient, legible, secure, cost-effective and safe. In some cases, it also allows the health care provider to access critically important information about patient’s current and past medications from pharmacy benefit managers and community pharmacies. This helps to alert the provider to other potential medication interactions or if patient is getting same or similar medications from multiple providers.

I have been given an opportunity to ask questions about the e-prescribing process and have had those questions answered to my satisfaction. I hereby consent to the practice requesting and using my medication history from other health care providers, pharmacies, or third party pharmacy benefit payers for treatment purposes.
